

Welcome to JinYao Toys' world

➤ RING BETTER
FOR CHILDREN

➤ QUALITY FIRST

➤ CUSTOMER
FIRS

Welcome to JinYao Technology Co.ltd, we are specialized in develop, design and produce one series of children puzzle toys, with more than 10 years experience at this field.

All the time, bring the more better gifts to Children is our mission, through the great effort of our designers and workers, we introduced more and more original design to our customers, and welcomed by children.

We have always believed that the quality is product life, all of our product can pass the BSCI/ISO9001/FSC/EN71/Phthalates/Cadmium/PAHs/ASTM-F963/HR4040 test and have test report now, through the great effort of workers/QC colleague/advanced production line, more and more customers accept and like our product quality, we will also try our best to

offer the more and more better product quality and service to our customers, hope we will have a sincerity cooperation in the near future, thanks in advance!

Our company introduces outstanding designers from all over the country, so that designers can brainstorm and bring us into the world of children.

In-depth perception of children's interests and preferences, using our professional domain knowledge and unique visual aesthetics, the potential to study children's favorite toy products. From multiple perspectives, based on the premise of bringing educational effects to children, we are always innovating, using interesting and vivid elements to create products that children can't put it down. From design to

R&D and production, we have all levels of control, while ensuring quality, we can let children gain something from playing through fun design.

We are adhering to the original mission of "bring better for children", working hard and adhering to the principles of "quality first" and "customer first" to provide our customers with high-quality services. We have always firmly believed that quality is the life of the product. The establishment of a quality control system for the entire value chain realizes the entire process of quality control, so that each product carries higher quality requirements, each raw material selection, every time for the optimization of the process and the inspection of each product, we strive to do better in every aspect.

PRODUCTION WORKSHOP

JinYao Printing Department was formally established in April 2021. In terms of hardware equipment, advanced printing equipment such as paper cutters and box punching and shearing machines are used to improve production efficiency.

The introduction of 6-color Heidelberg printing presses imported from Germany has further improved the entire chain production line on the basis of the original productivity. Under the premise of simultaneous improvement of printing technology and printing quality, the printing speed has also been accelerated, and the production of products has been accelerated.

CHILDREN'S TOY FIELD

In-depth perception of children's interests and preferences, using our professional domain knowledge and unique visual aesthetics, the potential to study children's favorite toy products.

From multiple perspectives, based on the premise of bringing educational effects to children, we are always innovating, using interesting and vivid elements to create products that children can't put it down.

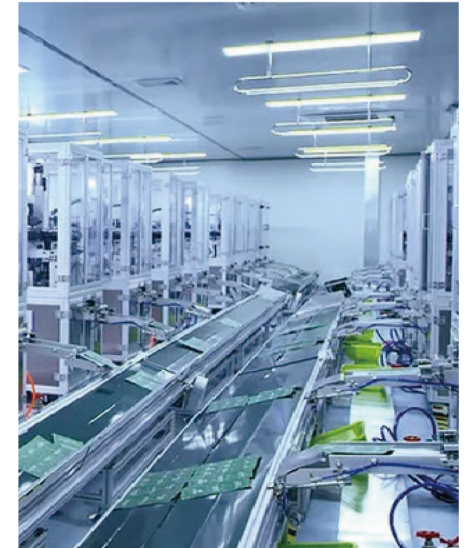

From design to R&D and production, we have all levels of control, while ensuring quality, we can let children gain something from playing through fun design.

JINYAO PRINTING

JinYao has an advanced modern production workshop, equipped with more than 10 sets of industry front-end technology equipment, including advanced production equipment such as heat shrink packaging machines, automatic molding machines, etc., to ensure the efficiency of production and meet their increasing production scale and production efficient. The daily production scale of the workshop reaches more than 10,000 sets, with more than 100 production employees, and an area of 15,000 square meters.
